

DSS Investigator IRS

Computer Aided Dispatch Instant Recall System

- ▶ Analog/Digital/VoIP/T1
- ▶ Client Software site license
- ▶ Easy to use
- ▶ Report Module
- ▶ Evaluation Module
- ▶ Multi level passwords
- ▶ Instant playback
- ▶ Archive to NAS &/or USB Hard Drives

Solution Overview

A Windows Based, Multi-Channel Instant Recall Recorder, DSS-Investigator is a multi-channel system used for storage and retrieval of voice and data recordings. DSS-Investigator was specifically designed as an economical solution where liability recording is required within your organization. Rugged durability, reliability, and functionality were achieved through precision hardware and software integrations. Recordings during surveillance and communications operations are easily and quickly provided to your desktop for immediate review.

Voice is recorded in a compressed format and immediately converts to Nonproprietary. WAV format for playback. "Fast Recall" features allow users to playback recent recordings quickly from an active monitor screen. During software setup, recording can be configured with time restrictions for dispatch depending upon a log on. Each position could have specific channels available: Ex: APU 1 has radio and APU 1 Telephone only.

Investigator IRS built for ruggedness, reliability, and user-friendly operation, the DSS-Investigator provides a robust instant recall platform.

SpecificationsFeatures

- ▶ D-400/500w Storm Series 4 U Rackmount
- ▶ 5.25" 4x 5.25"/3.5" 1x 3.5"/2x 3.5" (internal).
- ▶ 12" x 13" ATX M/B.
- ▶ Power ON/OFF, System & Alarm Reset.
- ▶ LEDs for Power ON/OFF, HDD, Fan & Alarm.
- ▶ Removable & Washable Air Filter.
- ▶ Playback from Dispatch Computer
- ▶ Ball Bearing Fans.
- ▶ Front Doors (Aluminum) Are Lockable.
- ▶ 19"(W) x 20"(D) x 7.0"(H).
- ▶ USB 2.0 Port.
- ▶ 7 slot ATX PCI.
- ▶ iStarUSA 500w power supply
- ▶ RAID 1 Hard Drives 250 G Hot Swap
